## Projects

### Payment Details Form (HTML, CSS)

- This project is typically used on websites where users need to enter their payment information (e.g., credit card details, billing address, etc.) to complete a purchase or subscription.
- The form is usually a part of the checkout process in e-commerce sites, subscription services, or donation platforms.

### Restaurants Website (HTML, CSS, JAVASCRIPT)

- A Restaurant Website project involves creating a user-friendly online platform for a restaurant that showcases its menu, services, and contact details.
- Using HTML and CSS, the website features a visually appealing layout, including sections like a homepage, menu, reservation form, and contact information.
- The goal is to provide customers with an easy way to explore offerings, make reservations, and contact the restaurant.
